1. Applicant's election with traverse of group I in the reply filed on 6/29/2005 is acknowledged. The traversal is on the ground(s) that the restriction places a serious burden on the Office and the Applicant but does not place a burden on the examiner. This is not found persuasive because the basis for establishing an independent or distinct invention in MPEP 806.05(e) is that the invention can be practiced by another and materially different process. This was the basis of the restriction which basis is not contended by Applicant. Since the same claimed apparatus may be used to practice materially different processes, additional art must be searched in order to ascertain whether or not the claimed method is allowable. Simply perusing the art applied against the apparatus claims is insufficient since there is more than one way to use the apparatus. Additionally, the method claims are separately classified in class 137 subs 1-15.26 which does require a separate search since there is a specific subclass for reciprocating balanced valves (class 251, sub 282) in the apparatus classifications. The requirement is still deemed proper and is therefore made FINAL.

2. Claims 2-15 and 22-25 are allowed for reasons stated in the remarks of 6/29/2005.

3. This application is in condition for allowance except for the presence of claims 16-21 drawn to an invention non-elected with traverse in the reply filed on 6/29/2005. Applicant is given ONE MONTH or THIRTY DAYS from the date of this letter, whichever is longer, to cancel the noted claims or take other appropriate action (37 CFR 1.144). Failure to take action during this period will be treated as authorization to cancel the noted claims by Examiner's Amendment and pass the case to issue. Extensions of time

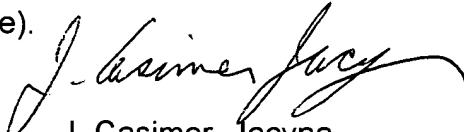

under 37 CFR 1.136(a) will not be permitted since this application will be passed to issue.

The prosecution of this case is closed except for consideration of the above matter.
